

# KIARA

*Introducing Kiara -- A Breakthrough Stem Cell Conditioned Media Powerhouse*

## *The Power of the Placental MSC Secretome*

Kiara is a revolutionary new conditioned medium product powered by the natural regenerative abilities of placental mesenchymal stem cell-derived Extracellular Vesicles (EVs), growth factors, proteins, peptides, and amino acids. These biologically active ingredients have been carefully selected to ensure you get the best nature has to offer.

Through a patent-pending process, Kiara uses the most advanced, naturally occurring, and commercially available Extracellular Vesicles—often regarded as the gold standard in the industry—ensuring maximum potency and efficacy in every application.\*

\* For Cosmetic Topical Use

## *Experience the Kimera Labs Difference*

As the #1 manufacturer of placental-derived MSC exosomes in the world, Kimera Labs Inc. has established itself as the leader in the commercial manufacturing of natural regenerative products. Our commitment to quality, compliance, and scientific excellence means we don't just create luxury cosmetic products; we create the most effective, and scientifically driven solutions on the market. Join the exosome revolution today with Kimera!
